

EMPOWERING YOUR WORKFORCE WITH COMPREHENSIVE BENEFITS SOLUTIONS

Clarity Benefit Solutions and **PES** have teamed up to simplify the complex world of employee benefits. Our partnership combines cutting-edge technology with personalized service to deliver a seamless benefits experience. Together, we provide a comprehensive suite of solutions that empower employees to make informed decisions and enhance their benefits experience.

COMPREHENSIVE AND INNOVATIVE SOLUTIONS

BENEFITS TECHNOLOGY

PES provides industry-leading benefits technology solutions, utilizing many user-friendly and robust platforms to streamline and simplify the benefits experience. Being platform agnostic, we are able to build on many different platforms, including, but not limited to, Employee Navigator, PlanSource, bswift and Ease.

BENEFITS EDUCATION

One of the most critical pieces of the employee benefits experience is education. PES licensed benefit counselors help to empower employees to understand the value of their benefits by providing benefits education through different avenues, including face-to-face meetings and over the phone through our Benefits Education Center (in-house call center). These solutions allow us to create a customized experience for benefits brokers, employers, and their employees, whether working in-office, remote, or in a hybrid role.

BENEFITS ADMINISTRATION

Our solutions go beyond benefits technology and education, providing a full suite of benefits administration solutions that not only improve the benefits experience, but help ease the burden on our clients' HR teams. These custom solutions include dependent verification, ACA compliance, and deduction & billing reconciliation.

COMMUNICATION

Keeping employees engaged and up to date on their benefits can be difficult. Our team designs custom communications including branded benefit booklets, open and post-enrollment flyers, brochures, videos, text and email campaigns, & microsites, to help keep employees plugged-in to all-things benefits.

VIRTUAL CARE SOLUTIONS

AllyHealth – a division of PES, allows us to offer our broker and client partners with a unique, all-in-one virtual benefits experience. Through our proprietary benefits delivery app, employees have access to virtual care services including Virtual Urgent Care, Virtual Primary Care, Virtual Dermatology, Virtual Psychology, Virtual Psychiatry, Employee Assistance Program, Health & Wellness Coaching, Savings Tools, Digital Wellness, and more!

A SIMPLY SMARTER **APPROACH TO IMPLEMENTATION**

We understand the value of implementing simple, effective technology solutions in the employee benefits experience. That's why we've worked hard to develop a growing, expert, in-house PES Data & Technology team.

This team is a critical part of the process which allows us to offer clients a first-class employee benefits experience. Behind the scenes, we gather vital data, build out our technology solution, test the platforms to ensure efficacy, liaise with carriers, and deliver final reporting to our carrier, broker and employer partners for billing and coverage

CUSTOM TECHNOLOGY BUILDS

Our technology solutions simplify the employee benefits experience by offering an intuitive benefits shopping and enrollment environment with mobile-friendly options.

RIGOROUS PLATFORM TESTING

Our team thoroughly tests every technology build, providing assurance to our clients that their employees will be able to easily and effectively enroll in their benefits online 24/7 and have uninterrupted access to important benefits information.

DATA REPORTING

Our team compiles reports which include elections, premium numbers, deductions and more, giving our clients insight into the success of their enrollment and ensuring carriers have the correct election information.

PROVEN IMPACT

Our clients have experienced significant improvements in efficiency, compliance, and employee satisfaction. With our integrated solutions, organizations have reduced administrative burdens and achieved higher engagement rates.

ASSISTANCE WHEN YOU NEED IT

While our preferred technology platforms are Ease, Employee Navigator, bswift and PlanSource, we are platform agnostic, meaning we can build on many benefits administration platforms. Through this partnership, you get a direct point of service contact model, which means that when you have questions, you have direct contact with one of our expert data and technology team members.
